

ÅSLJUNGA PALLEN AB

Lastpall för industrin sedan 1951

Bark

Specification:

Dry content: 50-60 %

Wood: Spruce/Pine

We remove and take care of all the bark from the log before it can be it makes it to the sawing. The bark is processed and refined to a high quality fuel for bio energy plants.

Our bark is popular among bio energy plants which provide thousands of customers with heat and energy. Our bark is also suitable to mix very dry fuels with.
