

Beams

Specification:

Weight: 520kg/m³
Wood: Spruce/Pine

Our sawn products are produced with the highest care and quality. We have a wide portfolio with the possibility to adapt the products dimensions according to you needs. All the raw material that we use to produce our sawn products comes from sustainable forestry from the Nordic countries.

We put a lot of effort in optimizing our yield in order to use as much as we can from the forest. When the trees are growing, they absorb carbon dioxide as the produce oxygen with the help of the energy from the sun and water. For every long lasting sustainable wooden product that we can produce we create the possibilities to lessen the amount of carbon dioxide in the atmosphere for the future.

Our sawn products are suitable to use for packaging and in the industry.

Dimensions

H: 47, 75, 80, 88 ,95
B: 75, 80, 88, 95, 100, 150

Quality

SS-EN 1611-1
G4-3
G4-4
V, VI, VII

Moisture content

SS-EN 14298:2017
MC: 7-20 %

Treatment

Kiln Dried 56°C/30

ISPM-15
